Date \_\_\_\_\_

To (Insurance Company) \_\_\_\_\_

From (Physician's Name) \_\_\_\_\_ (Hospital or Company) \_\_\_\_\_

\_\_\_\_\_ is a \_\_\_\_\_ (age) patient who has been under my care for \_\_\_\_\_ years.

She/he has a diagnosis of \_\_\_\_\_, which has been managed with \_\_\_\_\_

The patient's current weight is \_\_\_\_\_ and height is \_\_\_\_\_. He or She will require \_\_\_\_\_ calories-kcal/ounces per day.

This may adjust as his or her nutritional needs change. The use of Baby's Only Organic® is a key component to the medical management of the patient's condition. I am requesting insurance coverage and reimbursement for this patient, for whom I am prescribing Baby's Only Organic®

**Organic Premium Dairy with A2 Milk Formula** Healthcare professionals often recommend dairy formula as it naturally contains protein and carbohydrates most similar to breast milk.

**Organic Gentle Dairy with Whey Protein Formula** Contains 100% organic lactose as carbohydrate source; added organic whey protein powder. May aid in digestion and produce softer stools.

**Organic Gentle Dairy with Whey Protein & DHA Formula** Carbohydrate and protein content similar to breast milk. This contains added organic DHA & ARA from egg phospholipid to help boost brain and eye development.

**Organic Premium Dairy Formula with A2 Milk & DHA** Offering a formula with organic DHA & ARA derived from egg phospholipids. Studies conclude egg phospholipids are more easily absorbed and offer greater bio-availability than DHA currently used in leading formulas.

**Organic Sensitive with DHA Formula** This milk-based formula with organic DHA & ARA is intended for children who are lactose intolerant and offers an alternative to parents who wish to avoid soy protein in their children's diet. Do not use for children with galactosemia.

**Organic Pea Protein Formula** Only plant-based pea protein formula on the market. A complete nutritional formula for those wishing to avoid lactose, dairy, soy, and gluten.
